The HR Manager

Consult Recruitment

New Zealand

Kia Ora Madam/Sir,

I am writing to express my strong interest in the Performance Tester position at Consult Recruitment. With over two decades of experience in software quality assurance, including extensive work in performance testing, I am confident in my ability to contribute significantly to your team's success.

My background aligns closely with your requirements:

- I have over 3 years of hands-on experience in performance testing, with expertise in tools like JMeter and SoapUI. While I haven't used LoadRunner extensively, my adaptability and quick learning ability ensure I can quickly become proficient with it.
- I have a proven track record of analyzing performance test results and providing detailed, actionable reports. For instance, I identified critical performance bottlenecks for the KPN project and benchmarked application performance for Telia Sonera.
- My experience includes close collaboration with development teams to identify and resolve performance issues, as demonstrated in my work on the Fit Matrix Project and AWS Kendra projects.
- I have extensive experience in developing and maintaining performance testing scripts across various frameworks and tools.
- My role as a QA Architect at Persistent Systems involved leading performance tuning and optimization activities, significantly improving system response times.
- I have strong analytical skills, honed through years of interpreting complex performance data and translating it into actionable insights.
- While my experience with cloud platforms has primarily been with AWS, I am confident in my ability to quickly adapt to other platforms like Azure.

Additionally, my recent MBA has enhanced my business acumen, allowing me to approach performance testing with a broader perspective on its impact on business objectives..

Thank you for considering my application. I look forward to the opportunity to discuss how I can contribute to Consult's commitment to delivering high-performance, quality solutions.

Ngā mihi nui,
